

# Mass flow controller for gas MFC 2022

**Product code:** MFC2022

**Manufacturer:** Axetris

The OEM version of the Mass Flow Controller MFC 2022 is recommended especially for gas mixing and general control of mass flow applications. Thanks to his compact shape it's easy to integrate in any equipment and machine, providing a flow regulation extremely accurate even for low flows and short lead time. Ideal to obtain control and a precise measure of gas flows with custom features and on demand personalizations on full scale and calibrations.
