

Custom stand-alone system for gas mixing

Product code: GAS MIXER

Manufacturer: Axetris

Through the integration in one manifold and stand-alone system of OEM mass flow meters, OEM controllers, pressure sensors and external module, Axetris can realize one unic and compact solution, based on the customer's specific needs and application.

Contrary to the traditional mixing systems, that use standard mass flow meters, a custom stand-alone system allows to have a more compact solution at a lower cost.
