

LPM2610-C13

Product code: LPM2610-C13

Manufacturer: Figaro Engineering Inc.

The LPM2610 is a pre-calibrated module for LP gas alarms which is precisely calibrated in Figaro's humidity and temperature controlled facility. The module uses TGS2610-C00.

The most important process in manufacturing reliable residential gas alarms is adjusting the alarm point. Calibration is a complicated and time consuming process which also requires a substantial investment in calibration equipment. By eliminating the costly calibration process, this module enables users to easily and simply manufacture residential LP gas alarms.
