EDI030104NG

Product code: EDI030104NG
Manufacturer: Edinburgh Sensors

The Gascard NG is a OEM board with infrared sensor for the measuring of CO2.

This board, produced by Edinburgh Sensors, has beed developed to allow an easy integration in several applications in gas monitoring field and in particular for applications which need high quality, long term stability and precise measures. The board is temperature compensate and it has RS232 interface. As optional choice there is also the Ethernet interface.

The model EDI030104NG has range 0-1%.

Power Supply	24V DC (7-30V)
Measurement range	0-1%
Target Gas	Carbon dioxide
Output	0-20 mA
