

EDI010103

Product code: EDI010103

Manufacturer: Edinburgh Sensors

The Gascheck board, produced and supplied by Edinburgh Sensors, offers high performance detection and measurement of CO₂ at low cost, with a choice of pumped or diffusion aspiration technology to provide accurate and reliable determination of CO₂ gas concentrations.

The GasCheck family includes instruments to measure CO₂ in the ranges 0-3000ppm, 0-3% or 0-10% by volume. - See more at:

The version EDI010103 has range 0-3000 ppm, linear output and diffusion mode.

Power Supply	15V DC
Measurement range	0-3000 ppm
Target Gas	Carbon dioxide
Output	4-20 mA, linear
