

EDI050101NG

Product code: EDI050101NG

Manufacturer: Edinburgh Sensors

Chillcard NG is a board with infrared sensor for the detection of refrigerant gases.

The board supply an accurate measurement of refrigerant gas (on which the board has been calibrated by manufacturer) R-125, R-134a, R-22 in range 0-3000 ppm.

Power Supply	24V DC (7-30V)
Measurement range	0-3000 ppm
Target Gas	Refrigerant gases
Output	0-20 mA 4-20 mA
