## AX/5/SH

**Product code:** AX/5/SH **Manufacturer:** Solartron

The transducer AX/5/SH is an HBT with "Spring push" technology.

In a "spring push" probe the tip pushes outwards under the influence of an internal spring. When installed in a fixture it is frequently required to design a mechanism to bring the probe into contact with the piece part being gauged.

Characterized by an accuracy (% of reading or um) of 0.5-5 um; from a repeatability (um) of 0.15 and a sensitivity (mV / V / mm  $\pm$  5%) of 14,7.

Optimal for applications in metrology, test benches and testing, in the fields of Structures.

| Category          | Spring push |
|-------------------|-------------|
| Measurement range | ±5 mm       |
| Technology        | HBT         |
| Typology          | Analogic    |
