## AX/2,5/P

**Product code:** AX/2,5/P **Manufacturer:** Solartron

The transducer AX/2,5/P is an LVDT with "pneumatic" technology.

Pneumatic operation (pneumatic push or vacuum retract) allows the number of moving part in a fixture to be reduced, resulting in improved reliability and reduced fixture costs.

Characterized by an accuracy (% of reading or um) of 0.5-2,5 um; from a repeatability (um) of 0.15 and a sensitivity (mV / V / mm  $\pm$  5%) of 80.

Optimal for applications in metrology, test benches and testing, in the fields of Structures.

Category	Pneumatic push
Measurement range	±2,5 mm
Technology	LVDT
Typology	Analogic
