## **AS/2,5/F**

**Product code:** AS/2,5/F **Manufacturer:** Solartron

The AS / 2,5 / F is an LVDT free core characterized by external electronics.

The S series of displacement Trasducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications. It has a stroke (mm) of  $\pm$  2.5 and a sensitivity (mV / V / mm) 144.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

Electronics	External
Measurement range	±2,5 mm
Typology	Analogic
Output	Voltage
Version	Free core carrier (F)
