## **AS/5/U**

**Product code:** AS/5/U **Manufacturer:** Solartron

The AS / 5 / U is an LVDT guided with universal joints characterized by external electronics.

The S series of displacement Trasducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of  $\pm$  5 and a sensitivity (mV / V / mm) 178.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

Electronics	External
Linearity (%FS)	±0,2
Measurement range	±5 mm
Typology	Analogic
Output	Voltage
Version	Guided core carrier with universal jounts (U)
