

## VS/10/FU

**Product code:** VS/10/FU

**Manufacturer:** Solartron

The VS / 10 / FU is an LVDT free core characterized by internal electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of 10.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

<b>Electronics</b>	Integrated
<b>Linearity (%FS)</b>	±0,2
<b>Measurement range</b>	10 mm
<b>Typology</b>	Analogic
<b>Output</b>	Voltage
<b>Version</b>	Free core carrier (F)
