

IS/10/S

Product code: IS/10/S

Manufacturer: Solartron

The IS / 10 / S is an LVDT guided with spring characterized by internal electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of 10.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

Electronics	Integrated
Linearity (%FS)	±0,2
Measurement range	10 mm
Typology	Analogic
Output	Current
Version	Guided core carrier with spring (S)
