

AS/10/S

Product code: AS/10/S

Manufacturer: Solartron

The AS / 10 / S is an LVDT guided with spring characterized by external electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of ± 10 and a sensitivity (mV / V / mm) 76.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.
