

DS/20/S

Product code: DS/20/S

Manufacturer: Solartron

The DS / 20 / S is an LVDT guided with spring characterized by internal electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of 20.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

Measurement range

20 mm
