

AS/25/G

Product code: AS/25/G

Manufacturer: Solartron

The AS / 25 / G is an LVDT guided characterized by external electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of trasducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of ± 25 and a sensitivity (mV / V / mm) 21.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.

Measurement range

± 25 mm
