

SE100GF-T

Product code: SE100GF-T

Manufacturer: Tecnosens SpA

Digital handheld gas leakage detector, equipped with an external whip (for reaching the point in which the leakage is likely to happen) at whose end is mounted a gas semiconductor sensor for detection of low concentrations of hydrocarbons in gas appliances and pipes. This device can detect either Methane (CH₄) or LPG (a mixture of isoButane and isoPropane), but generally to several types of Hydrocarbons.

Sensors	Semiconductor
Power Supply	Batteries
Dimension	72 x 151 x 37 mm
Housing	ABS HG
Weight (grams)	312 g
Measurement range	0 - 10.000 ppm CH ₄ 0 - 1% VOL CH ₄ 0 - 20% LEL CH ₄ 0 - 1.800 ppm LPG
Resolution	1 ppm
Working temperature	0°C / 45°C
