

DC PSIM

Product code: PSIM DC

Manufacturer: Solartron

PSIMs are used to power a network of Orbit® modules and sensors from an AC or DC power source. Most Solartron sensors and modules run on 5V, except Orbit® LT and Orbit® LTH which also require 24VDC. Certain PSIMs can output both voltages.

The AC PSIM is supplied connected to a mains power Module with the appropriate mains lead.

The DC PSIM is supplied with a standard 2 m cable.
