

## DIM

**Product code:** DIM

**Manufacturer:** Solartron

Solartron offers a range of modules to provide interfaces to other transducers and control processes.

The flexible AIM (Analogue Input Module) can take inputs from any transducer with a voltage or current output, the EIM (Rotary) Encoder Input Module provides a route to angle information which can facilitate part profiling and the DIOM provides control inputs and outputs.

**Typical input**

Digitmatic transducers

**Reading per seconds**

Reading on request

**Input type**

DIM
