

TV10 0051

Product code: TV10 0051

Manufacturer: Twiga

The board transmits and filters the signal from the 4K camera to provide an optimum quality of image. All camera resolutions and frame rates are supported.

FEATURES:

- 2160p, 1080i, 1080p and 720p output support
- HDMI output 1.4b up to 49 ft. (15m)
- Internal Micro Coaxial Cable up to 400mm
- Board and Camera management via RS232/TTL
- Push buttons for zoom, freeze and more (optional TV10 0022)
- Video format selection by micro switch
- Supply voltage: Power input 6 to 12V DC
- Tiny module size 63mm x 38mm x 7.5mm

APPLICATIONS:

- **Medical**, redefining imaging for surgery: thanks to the 4K technology, fine structures can be identified with greater precision, offering surgeons a clearer picture during open surgery or minimally invasive procedures
- **Broadcast/sport**: 4K picture gives the viewer at home the impression of actually being at the match and offers to the audience an immersive new experience
- **CCTV industries**, 4K surveillance with extra

intelligence: One 4K monitor can display 4x4 scaled D1-size image which is very effective for viewing multiple cameras

Power Supply	6 a 12 VDC, 6 W (camera included) 0.15 W (in idle)
Connector	HDMI
Dimension (mm)	7.5 (H) x 63 (L) x 38 (W)
Weight (grams)	17 g
Output protocol	4K HDMI
Working temperature	From -5°C to 60°C
