

* Sensor not included

EM5141A

Product code: EM5141A

Manufacturer: Figaro Engineering Inc.

This module is useful for evaluating basic performances of TGS5141 gas sensor and as a reference of application circuit.

- Converts sensor output current to voltage output
- Module designed with electrical noise reduction for stable operation
- Anti-polarization circuit during power OFF period

Output	Voltage
Measurement range	0-5000 ppm
Compatible sensors	TGS5141
Target Gas	Carbon Monoxide
