

## 2-channel sensor systems SPECTRO-2

**Product code:** SPECTRO-2

**Manufacturer:** Sensor Instruments

The SPECTRO-2 series now closes the gap between contrast sensors (SPECTRO-1 series) and color sensors (SPECTRO-3 series).

The SPECTRO-2 system can operate as a pure 2-channel system (quasi two SPECTRO-1 sensors in one housing), or as a comparative (normed) system in which one channel can function as a reference.
