

Bidirectional Mass Flow Meter

Product code: Bidirectional Mass Flow Meter

Manufacturer: Axetris

Small compact mass flow meter module with RS-232 TTL and analog 0...5 V interface, with the capability of measure the flow in both direction.

This product is based on the proprietary Platinum MEMS technology from Axetris (MEMS: Micro Electro-Mechanical Systems). It offers the following advantages:

- Ultra compact size
- Fast response time
- Excellent repeatability and accuracy
- Rigid stable design
- High dynamic range
- High long term stability
