EM5042A

Product code: EM5042A
Manufacturer: Figaro Engineering Inc.

This module is useful for evaluating basic performances of TGS5042 gas sensor and as a reference of application circuit.

- Converts sensor output current to voltage output
- Module designed with electrical noise reduction for stable operation
- Anti-polarization circuit during power OFF period

* Sensor not included

Measurement range	0-10.000 ppm
Compatible sensors	TGS5042
Target Gas	Carbon Monoxide
