

Quad NDVI/Red-Edge Lens 10 Bands

Product code: 10 bands - Quad NDVI/Red-Edge Lens

Manufacturer: Agrowing

Single lens kit or camera + lens kit available

The Agrowing lens kit based on 61MP camera provides multispectral images of 12 megapixels per band.

Agrowing sensor provides incredibly detailed NDVI maps, which enable early detection of abnormal areas in the field.

The sensor provides detailed multispectral images. These images allow the implementation of artificial intelligence techniques for the isolation, classification and identification of irregularities such as blight or the presence of harmful pests and insects in different types of cultivation.
