

EM7160

Product code: EM7160

Manufacturer: Figaro Engineering Inc.

Evaluation Module and test of Carbon Dioxide sensor CDM7160.

- Serial data output, PWM output, and voltage output of measurement data from CDM7160 sensor module
- Stores measurement data in PC using PC application software
- Displays measurement data on a PC monitor
- Control CDM7160 operations using PC software

Compatible sensors

CDM7160

Target Gas

Carbon dioxide

Output

PWM
Voltage
Serial
