

Black band

Product code: Black band

Manufacturer: Tecnosens SpA

In automotive car glass it's necessary to check the uniformity of the thickness of the black band

Tecnosens' Thickness Scanner allows to detect the thickness of the black band printed on car glass using a dedicated linear scanner.

The system detects the thickness along the external band of a car glass with a measuring linear area of 50mm.

The scanning head can be moved manually or with the use of a robot.
