LadonPark

Product code: LadonPark

LadonPark is the Made-in-Tecnosens software for automatic monitoring of parking lots, garages, and campsites through license plate reading. This makes parking management safe and effective: registered vehicles are recognized and authorized with the automatic opening of the gate, while those that are not registered are reported to the operator who, after a check, can proceed to manually open the gate.

- Ideal for both small private users and large hotels and campsites

- Flexible rules: set permissions for time ranges and license plate groups

- Possibility of integration with management systems

- Advanced reporting

- Barrier opening in trigger and/or free-run mode

- Available cloud plans: easy, standard, pro, enterprise

- Extremely easy to use
