

EDI030090NG+

Product code: EDI030090NG+

Manufacturer: Edinburgh Sensors

The Boxed Gascard is the latest development in the NG range of products from Edinburgh Sensors, for CO₂ measurement, in a robust aluminum housing.

This board, produced by Edinburgh Sensors, has been developed to allow an easy integration in several applications in gas monitoring field and in particular for applications which need high quality, long term stability and precise measures. The board is temperature compensate and it has RS232 interface. As optional choice there is also the Ethernet interface.

It is available in the following range: 0-3000ppm CO₂

Power Supply	24V DC (7-30V)
Measurement range	0-3000ppm
Target Gas	Carbon dioxide
Output	4-20 mA 0-20 mA
