

TEC-OXY-METAL-ZZ

Product code: TEC-OXY-METAL-ZZ

Manufacturer: Tecnosens SpA

Module with aluminum housing for the oxygen measurement in different ranges, from 10ppm up to 96%, based on zirconium oxide technology.

This technology allows accurate and accurate measurements to be obtained, ensuring high stability over time; therefore requiring little maintenance.

The electronics to which the sensor is connected, designed and produced by Tecnosens S.p.A., manages the conditioning of the sensor and outputs a linear signal to the concentration of oxygen.

Depending on the application, the TEC-OXY-METAL can be customized to suit any use:

- Full scale available: 1000ppm / 1% / 2% / 3% / 5% / 25% / 95% / 96% O₂
- 4-20mA current outputs and 0-10V voltage
- Communication via RS485 and Modbus protocol

Power Supply	12 - 24 Vdc
Measurement range	10-1.000 ppm 0.05-1 % 0.05-2 % 0.05-3 % 0.05-5% 0.1-25 % 0.1-96 %
Target Gas	Oxygen
Output	4-20 mA 0-10 Vdc RS485
